Draka Pak Solution Kits

Draka Paks are elevator product solutions that combine product to provide our customers with a greater value. These solutions are specially selected & packaged by Draka Elevator Products to meet the needs of our customers and are Draka Proven. This means that the contents of these kits, when combined, create a stronger solution; and are certified to work well together.

When products are combined in this fashion, we are able to provide the costs savings to our customers as well as simply the order process. It's simple; one package, one part number and one low price. Draka Paks are elevator product solutions that are combined to provide

our customers with a greater value. These solutions are specially selected & packaged by Draka Elevator products to meet the needs of our customers and are Draka Proven.

Draka Elevator Products is making two new kits available to our customers. They are the Draka Safety Pak and the Draka Pit Pak.

Draka Safety Pak

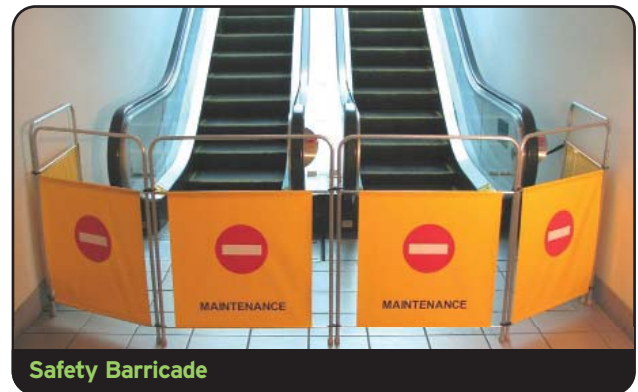

This solution starts with safety focused on the mechanic. It supplies everything you need to work safely and comfortably.

Specifically, you get a hard hat, goggles, safety glasses, respirator, gloves, knee pads and ear plugs; an in-line GFCI and current tester, lockout tags, hasps and a padlock; and a general first-aid kit.

Also included is a personal fall prevention harness for use in the hoistway. It features a secure harness with strong webbing and tongue buckle connections along with a lanyard, cross arm strap and sack to hold the kit.

Finally this Draka Pak includes a four panel safety barricade for use on the job to keep pedestrians away from danger. It is a lightweight temporary barricade system in bright safety yellow that serves as a visual warning. "DO NOT ENTER" wording in red and white is included. It is 42"

high with 30" wide outer panels and 34" wide center panels. It comes pre-assembled for easy deployment. The hinged units fold easily for storage and transportation. Outer panels can include custom printing.

Draka Pit Pak

This Pak starts with the basic pit essentials. The ladder, switch and light are common to all pits.

This Pak also features the Pit Alert Water Detection system. Equipped

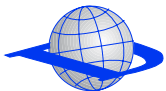

with radio-frequency (RF) technology, this device monitors your elevator pit for water leaks and flood conditions. If water is detected in the pit, the Draka Pit Alert sounds an alarm, alerting technicians that the pit is being flooded. It can even signal the elevator controller to move the cab to an upper floor to keep your traveling cables dry.

More Than Cable. Lots More.

Part Number	Description
8-323-0010	Draka Safety Pak
8-018-0002	Draka Pit Pak
